# Solution, purpose and technical data

Company Bamiko s.r.o. is a Czech company that specializes in Swimwear Spin Dryers manufacturing. Bamiko company follows the trend and helps to improve quality standards by offering a high quality, reliable and appealing product for every modern establishment.

## Why to choose our Swimwear Spin Dryer?

- it can extract up to 95 % of water from the swimwear in just 10 seconds
- it is made from a high quality passivated stainless steel and durable plastic
- it is the only Swimwear Spin Dryer on the market that allows you to choose from vast selection of appealing designs, therefore it fully adapts to your needs
- it is very easy to install (230 V power socket and wastewater drain), easy to use and maintenance takes just a few minutes
- it has extremely low operating costs (power 280 W) and it can significantly increase safety and lifespan of your establishment (less water on the floor and in the changing rooms)
- it is very safe and the drum would not spin when the lid is not closed, it is in compliance with every standards and regulation and ready to serve your needs

## For whom is the product intended?

- for every swimming pool and aquapark, members of swimming clubs, school kids or any other visitors will no longer have to deal with wet swimwear
- for outdoor/natural swimming pools, the swimwear spin dryer just needs to be installed indoor
- for every hotel and wellness center, your visitors will no longer have to dry their swimwear in the room (where it can stain the carpet) and will not have to worry anymore about putting a wet swimwear into their suitcase
- for every spa facility, with aqua treatment
- for every household with indoor/outdoor swimming pool, with an indoor installation
- and for every other place where swimwear drying is needed

## Technical data:
